Cga Marker Comments Pdf

Tumor Markers Tumor markers are substances, often proteins, that are produced by the cancer tissue itself or sometimes by the body in response to cancer growth. Because some of these substances can be detected in body samples such as blood, urine, and tissue, these markers may be used, along with

Assignment 2 mark

I have the same problem, this is the 2nd time I get the comment that my Criteria is the laundry list and I am not giving reason for selecting them. I don't understand what does the marker mean by this. I went through past exams, and have the exact same format, I guess it is not good enough. Could some one please share their assignment.

PCa Commentary #125: NEUROENDOCRINE PROSTATE CANCER: An ...

The study compared the diagnostic utility of the two serum markers known be associated with NEPC: neuron specific enolase (NSE) and chromogranin A (CGA). They found that the best predictor for the presence of NEPC was a combination of NSE >6.05 ng/mL and CGA >3.1 ng/mL. This combo yielded a sensitivity of 95%.
